**DETAILED ACTION**

***Election/Restrictions***

**Claims 17-54 are pending**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-36, drawn to a kit for site-specifically transforming cells *in vivo* comprising a catheter and a nucleic acid comprising a gene encoding p21, classified in class 435, subclass 455.
- II. Claims 37-54, drawn to a kit for treating disease in a patient comprising a syringe and a nucleic acid comprising a gene encoding p21, classified in class 514, subclass 44.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects. The kits or inventions I and II comprise materially different products and can be used in methods having different method steps that require materially different reagents and different technical considerations. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate classification, and separate search requirement, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
